

Sample Date Plan — Dating Stage

Template for illustration only. Not legal advice — have this reviewed by qualified counsel in your jurisdiction before use. Bracketed items are placeholders to be filled per-user or per-region.

1. Parties & Scope

This agreement is entered into by [User A] and [User B] (each a "Participant") through the DREAM platform ("the Platform"), governing a single scheduled date instance. It nests under the broader Dating-stage "getting-to-know" agreement and does not itself constitute a relationship, exclusivity, or any longer-term commitment between Participants.

2. Date Details (auto-filled from locked slot)

- **Date & time:** [auto-filled]
- **Meal type:** Breakfast · Lunch · Coffee · Dinner
- **Venue / cuisine:** [Pre-agreed] or "decide together"

3. Payment & Fees

- Payment opens once both calendar availability and venue/slot are confirmed — not before.
- Per-date fee of [₹ amount], or coverage under an active date-subscription plan.
- Fees are processed through the Platform's payment system; Participants do not exchange payment details directly for the purposes of this booking.

4. Bill Split (as selected at booking)

One of: **50/50 · alternate-treats · host-pays · pay-your-own**. The selected method is binding for this date instance unless both Participants agree to change it before the date occurs.

5. Cancellation & No-Show Policy

(Modeled on standard service-platform cancellation frameworks — e.g. rideshare/booking cancellation-fee structures.)

- Cancellations made **more than [X hours]** before the scheduled time: no fee.
- Cancellations inside the notice window, or no-shows: a cancellation fee of [₹ amount / % of booking] may apply, payable to the other Participant and/or withheld from the cancelling Participant's payment method.
- Repeated late cancellations or no-shows count toward the Compliance Rating (Section 7) and may restrict future booking privileges.

6. Code of Conduct

Participants agree to:

- Treat each other with respect; harassment, discrimination, or abusive behavior of any kind is prohibited.
- Not solicit the other Participant's contact information, employment, financial participation, or any activity outside the Platform's stated purpose during the date.
- Not record, photograph, or share content of the date without the other Participant's consent.

7. Background Verification & Compliance Rating

(Modeled on service-platform trust & safety norms — e.g. rideshare driver/rider rating systems.)

- This match and date were facilitated in reliance on the Background Verification (BGV) check completed at sign-up. Participants confirm the accuracy of their submitted information remains current.
- Following each date, Participants may rate one another on conduct and adherence to this plan, similar to rating systems used on service-oriented platforms.
- A pattern of low ratings, verified misconduct reports, or Playbook violations may result in warnings, temporary suspension, or permanent removal from the Platform, independent of any single match's outcome.

8. Safety

- Participants are encouraged to meet in the public venue confirmed at booking and to share date details with a trusted contact outside the Platform.
- Any safety concern, misconduct, or Playbook violation can be reported through the Platform's reporting mechanism; reports are reviewed under the Platform's trust & safety process.

9. Liability & Assumption of Risk

(Modeled on standard marketplace-facilitator disclaimers — e.g. "we connect participants; we are not a party to what happens between them.") The Platform facilitates introductions, scheduling, and payment for this date; it is not a party to, and assumes no liability for, the conduct of either Participant during the date itself. Participants assume the ordinary risks of meeting a new person and agree to exercise reasonable judgment and caution.

10. Dispute Resolution

Disputes arising from this date instance should first be raised through the Platform's support channel for informal resolution. [Insert arbitration / governing-law clause per jurisdiction if the Platform's Terms of Service require it.]

11. Data & Privacy

Only information explicitly shared as part of match and booking (name, verified badges, confirmed venue/time) is disclosed between Participants. Exact contact details and precise home address are not shared as part of this plan.

12. Term

This Playbook governs the single date instance described in Section 2 only. It expires automatically upon completion of the date (or cancellation per Section 5) and does not carry forward to any subsequent date unless a new instance is generated.

Industry patterns this draws on: cancellation-fee windows and no-show handling (rideshare/short-term booking platforms), rating-based standing and deactivation thresholds (rideshare/service marketplaces), platform-facilitator liability disclaimers (marketplace apps connecting two independent parties), and in-app safety reporting with a "share your trip/date" pattern (rideshare safety features).

Still open, worth deciding before this goes live: the exact cancellation fee amount/percentage, the specific notice-window length, the rating scale (stars vs. thumbs vs. tiered), the threshold that triggers suspension vs. permanent removal, and which jurisdiction's arbitration/governing-law clause applies.
